

Call for Papers

Special Issue of *Fijian Studies* on

Environment, SIDS & Sustainable Development

May 2004

Special Guest Editors

Dr Mahendra Kumar,
Head of Physics Dept,
University of the South Pacific.

&

Dr. Jenny Bryant,
Consultant,
Suva and Dunedin

This special issue of *Fijian Studies* is devoted to the important issues of energy and environment for sustainable development, in the context of small island states. The special issue is designed to provide focused and well researched papers to policy makers to assist with deliberations and decisions at the Barbados Plan of Action (BPOA) meeting in 2004.

Fijian Studies calls for papers on the following key areas:

- Renewable energy for the sustainable development of SIDS
- The role of environmental issues in sustainable development of SIDS
- Women and environmentally sustainable development in SIDS
- Pacific response to the Barbados Plan of Action, with case studies of any of the key themes.
- Governance of sustainable development in SIDS
- Any other topic that is deemed appropriate, after consultations with the editors.

The papers should have relevance to islands but with particular focus on Fiji. Papers are due by January 31 2004. Electronic versions should be sent to both editors at kumar_m@usp.ac.fj and jennybryant@xtra.co.nz. All papers will be refereed.

Reviews of books are also welcomed on topics relevant to Small Island Developing States, as well as global dilemmas of sustainable development. Hard-copy submissions should be sent to: Dr. Mahendra Kumar, Physics Department, University of the South Pacific, Suva, FIJI.
